Project Overview

Campusmate is a social media platform designed specifically for college students. It serves as a hub for announcements, buying and selling books, sharing notes, and fostering student communication. The app emphasizes simplicity, accessibility, and ease of use, functioning entirely on the frontend without a backend server.

Technology Stack

- **Frontend:** HTML, CSS, JavaScript
 - **Data Persistence:** local Storage API for saving posts, likes, and comments
 - **UI Features:** Dark mode, responsive design for multiple devices, and smooth animations
-

Features

- **Persistent Posts:** All posts are saved locally on the user's browser using local Storage, ensuring data persists across sessions.
- **Likes and Comments:** Users can interact by liking and commenting on posts, with all interactions saved persistently.
- **Real-time Updates:** New posts appear instantly on both the home feed and user profiles without page refresh.
- **Profile Filtering:** Users can filter posts by URN (University Roll Number) to easily find content relevant to specific students.

- **Dark Mode:** User-friendly dark mode improves usability in low-light environments.
 - **Responsive Design:** The interface adapts seamlessly to desktops, tablets, and mobile devices.
 - **Animations:** Smooth UI animations enhance the overall user experience.
-

Future Enhancements

- Implement user authentication to enable personal profiles and secure login.
 - Allow profile customization for students to personalize their space and preferences.
-
